Group: IT2B, Envitron
Project: Predicting electricity demand for one building at a time
Document: Individual feedback on your contribution and teamwork (Project 2.1, period 1)
Date of feedback: 3 November 2026

Feedback

Feedback describes you as a very reliable, fast and approachable teammate who is creative and finds out what is not known (*investigative attitude*, *collaboration*). As Scrum Master and secretary you kept minutes, documentation and client reports well structured and up to date, ran sprint reviews and retrospectives and prepared the structure for presentations (*organising ability*, *quality awareness*). You also built and improved a prototype in several versions based on the client's weekly feedback, and documented results at each stage (*programming*, *analytical ability*, *receiving feedback*). Your own account is thorough and evidence-based (*reflecting on own contribution*).

No concrete points for improvement were raised.

This feedback summarises what teammates and the client said about your contribution, without names. The words in italics refer to competences. It is not a grade.
